

Interior Health Aboriginal Health and the Tripartite First Nations Health Plan

REGIONAL DISCUSSION

Working in a Tripartite Way

What this means for us
Our successes
What's Next?

Interior Health

WORKING IN A TRIPARTITE WAY...WHAT WE'VE SEEN

Increased commitment to First Nations collaboration in planning, implementation and delivery of services that will reduce the health disparity gap;

Increased recognition, communication and collaboration with our Tripartite partners

Increased participation in tripartite discussions outside of our health authority;

Increase in the number of champions who are forwarding our cause to create a culturally safe, relevant, and ethical health care system.

Aboriginal specific targets in all Service Alignment Plans

Increased use of LOU and other formal mechanisms

Ultimately, a real commitment to working in a different way.

TRIPARTITE PARTNERSHIPS (HA/FNHC)

Community Development Liaison – Mark Matthew
