# Leadership Challenge

## Incentives

Individuals and communities will be recognized for the special effort they put forward to make their communities healthier. They must:

- Show commitment and effort in setting individual and community goals;
- Address the health problems in our First Nations Communities and made a conscious effort to address this;
- Complete the individual, workplace, and community goals that they chose;

Recipients will receive a **\$1000** gift incentive package from the First Nations Health Council. The incentive package can be chosen by the participant that completed the Leadership Challenge.

Each of the Challenge participants can pick and receive their incentive from the Health Council's supplier's list. Items not on the list will be considered on a need basis.
